Educational background

My educational and research background is very broad spanning over the Arts, Social and Natural Sciences. Most of my publications so far lie in the intersection between Historical Ecology, Environmental History, Long term Ecology, Ecological Theory and links with applied conservation and most recently development theory and social studies (Ekblom 2012, ongoing project). Geographically my main research focus has been on southern Africa, but I have also supervised theses from Cameroon, Sweden. I have also worked in Sweden with Environmental History and field archaeology for many years.
